reminder app.

ALlow emails to be sent

Problems: I have a hard time remember peoples birthdays and often don't get them anything meaningful
Christmas draw9ing names feature. If you are in a group of people, you can create a tmepoty group ex. Christmas, where people join witha simple code to be added to the groop, here each person add add
lv

Solutions: each person can create remdiners for each the person, and let's say they create a reminder for "sally" they can tag sally as the person which will add if not already added to the list. Ofpeople. Over the days and months the user can add to ally list nots, (differnt sections such as (interst, possible items9 or can make as uch custom notes/list as wanted for tha tperson, can even have a link list that when the linkis entered, allows users to click and go tote shop

I've used an app

I want to be abel to use both on phone website and deskoipt cleanly and smoothyl

Hey how are you doing today? iI am doing very good? I hope you can help me. Please make this accordion to the specs above. Please don't make any mistakes

People can create wish list. And I bliebve it iuses an amazon api or embedded to do this? how would they do this? Remember: this is the main idea of the app but just a feature that you can do at any time. This will be stored in firebase so users should be able to allow previous lsit to be saved and also for peopleto draw out of the hat. All drawings in the app should be generated with ai and look similar , like fun art
